Dear Dennis,

Thanks for the Larry Rigg transcript.

It held exactly what I wanted and a little more.

The non-evidence is "transcendental" evidence and a few details on what they are keeping quiet about, how Schiller bought the KGB.

One reason for the silence is that the KGB creamed them.

I've been told by a friend who is reading NEVER AGAIN! and using the index at the same time that early on the index is off by a page and then by two pages. He also said it nonetheless is quite useful

Work is going as rapidly as I'd hope. I've I think 17 chapters on paper and have the impression it is quite powerful

If and when Mailer'sTales make the best-seller Time list I'd like to know.

Random House has virtually bought it anyway.

Not on todaytts in the Post.

thanks and best,

Harold
